Time & Billing System Features

If you work in a field where billing is based on time or specific deliverable products such as documents, drawings or other files, you've doubtless encountered the need for clear, accurate, and efficient billing. Our time and billing system helps professionals in a wide range of industries manage their time keeping with ease, while offering the ability to take firm control over every aspect of record keeping and billing.

This system is based on a Microsoft SQL Server database and a web based user interface, making it flexible for contractors and employees from various locations to manage their work hours.

The application focuses on organizing the following elements:

- :: Projects and Jobs
- :: Deliverables management
- :: Clients and Customers
- :: Employees and Contractors
- :: Timesheets

In addition to these features, the application also provides a deliverables, documents, and drawings register, as well as a multi-functional reporting system. This easy to use and yet powerful application can help you prevent unbilled hours and can free you from excessive accounting time.

For a brief overview of this system you can watch this video at www.matrixconsultants.com.au/TimeBilling.html
